Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Group I, claims 7-16, drawn to a process for forming a wiring, classified in class 438, subclass 687.
- II. Group II, claims 17-25, drawn to a copper alloy for wiring, classified in class 257, subclass 762.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, i.e., instead of "diffusing the additional element from the additional element layer", an alloy of Cu and the additional element of the required composition may be directly deposited.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and that the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2811

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
